

Stefan Sing und Cristiana Casadio „Tangram“

Technikanforderung bei Outdoorveranstaltungen

The technical needs are very simple. The festival has to provide:

- a soundsystem that fits for the spot where they perform.
- space: 8 x 8 m, 5 m high
- black dance carpet if they perform on the street. or a wooden stage.
- no lights if they are performing by daylight.

They can do 2 shows per day. Each is about 40 minutes
